- October 23-25 [Canadian Pulse Research Workshop](#)
- November 19-22 CWSS - Niagara Falls, ON.

PLENARY SESSION: Wednesday November 21, 2018 - 8:30 am to 5:00 pm

"New Frontiers in Weed Management"

To Register: www.weedscience.ca

The quest to minimize the impact of competitive weedy plants on the production of safe, affordable food has been challenged by herbicide resistant weeds, new/non-native weed species, unpredictable weather and logistical challenges with farm machinery. What are the innovative tools, technologies, ideas and information that will allow farmers, agronomists and scientists to address these issues? What will be the new frontiers in weed management? Topics covered will include:

	Dr. Maor Matzrafi University of California/Davis Hyperspectral technologies for assessing seed germination and herbicide response in Palmer amaranth		
	Dr. Scott Noble University of Saskatchewan Current and future use of imaging and data collection tools along with analytical techniques for crop protection		Steve Johns, Syngenta Lessons learned from over 35 years of working with farmers
	Dr. Tom Wolf, Agrimetrix Optimizing sprayer efficiency to improve weed control		Dr. Steve Shirtliffe, University of Saskatchewan Advances in mechanical weed control
	Dr. Robert Zimdahl Professor Emeritus Colorado State University Ethics, Agriculture and the Environment		Dr. Clarence Swanton University of Guelph The perpetual motion of plant interactions
