

This month's graduate student profile is of Mr. Hugh Qiming Lyu.

Originally from the south eastern Chinese province of Fujian, Hugh has been living in Nova Scotia since 2012. Two years ago, he started his Master of Science degree with Dr. Scott White in the Faculty of Agriculture at Dalhousie University's where he is building upon his previous research experience in wild blueberry production and vegetation management. Currently, he is working vegetation management project for Nova Scotia wild blueberry production fields which involves conducting a weed survey to develop management strategies for Spreading Dogbane (*Apocynum androsaemifolium* L.). So far, he has been enjoying his time in Canada and will be looking for a position in the agricultural industry once he has defended his thesis. In the future, Hugh would like to get involved with agricultural projects aimed at aiding developing nations improve their food production systems.
