

Name: Marinda Gras

Occupation: Masters student in Plant Agriculture at the University of Guelph

What are you researching? Briefly describe your project.

Relay intercropping with winter canola and soybeans. Looking at the effectiveness of this cropping system through two canola planting densities and two spring fertilizer application rates.

Previous work and volunteer experience in Weed Science:

Participated in OAC Weeds Team during my undergrad. (2016)

How did you become involved with CWSS and when?

New member – just became involved and I'm excited to learn more.

What is your favorite weed and why?

Milkweed sticks out to me – smells lovely in the summer when in bloom.
